Address: **Shawnee Try, Blue Spgs, Cadiz**
Price: **Free**

This pull behind your riding mower vac has a 6.5 B&S motor. I pulled it over a curb and broke a bolt off on the part that has the impeller in it . (attached to the motor)

This in turn caused the motor to throw oil . I shut it down and the motor was still running . Probably a seal on the shaft between the motor and impeller ? Don't have the time nor inclination to tear it down and repair . My loss your gain . First text to 615 202 7943 gets it .

No phone calls please . I'm in Cadiz , blue springs area . Must be picked up here .
